Squares and Square Roots

Big Ideas: *Square numbers (aka perfect squares) are the product of two whole numbers--can be drawn, or
                    created from squares.

              *Square roots are identical factors--or the sides (roots)--of a square number

Examples:

Square numbers can be seen easily on
a multiplication chart:

Square symbol

$$4^2 = 16$$

Square root
symbol
(radical)

$$\sqrt{16} = 4$$

x	1	2	3	4	5	6	7	8	9	10	11	12
1	1	2	3	4	5	6	7	8	9	10	11	12
2	2	4	6	8	10	12	14	16	18	20	22	24
3	3	6	9	12	15	18	21	24	27	30	33	36
4	4	8	12	16	20	24	28	32	36	40	44	48
5	5	10	15	20	25	30	35	40	45	50	55	60
6	6	12	18	24	30	36	42	48	54	60	66	72
7	7	14	21	28	35	42	49	56	63	70	77	84
8	8	16	24	32	40	48	56	64	72	80	88	96
9	9	18	27	36	45	54	63	72	81	90	99	108
