December 13, 2024**

**Deadline for Submittal of Proposals  
January 17, 2025  
BEFORE 12:00 p.m.**

**Site Walk Sign-In and Discussion  
Posted December 20, 2024**

---

**Required Bid-Walk Sign-in:**

Please see the sign-in sheet attached to this posting

---

**The following items were discussed on the site walk:**

Brief overview of the project and the reason for the three options were given.

**New Site Map Released:**

- Comment was made that the path between MDF and IDF8 might not be correct. Explained that we don't know the exact path, but updated it for clarity. The distance as originally estimated remains at 550' as a Google Earth distance map had 480' distance as calculated with the update map drawing.
- Added the label for IDF2 as it is mentioned in the Option 3 part of the bid. This is merely for clarity as no work is performed in IDF2

**Changes and clarifications from site walk**

- Option 2, bullet point #2 was changed from 12-strand to 24-strand 62.5um. The distance of 550' can remain based on Google Earth estimation based on the path outlined in the updated Site Map.
- Option 3, IDF3 it was clarified that a Drop Splice can be installed into the IDF 3 electrical room (where the conduit enters the building) for splice through to the remaining IDF's with a 6 strand also delivered to IDF3 on the other side of the wall.

Site walk was completed at approximately 4:00 p.m. with all members who signed in still present.
